The finishes represented here are provided as a color guideline. Due to natural variations in both solid wood and veneer, minor variations in color and grain may occur. Please contact an OFS customer service representative for an actual wood or laminate finish sample. See our price list for finish availability within each product series.

Cherry Finishes

MNC Natural Cherry

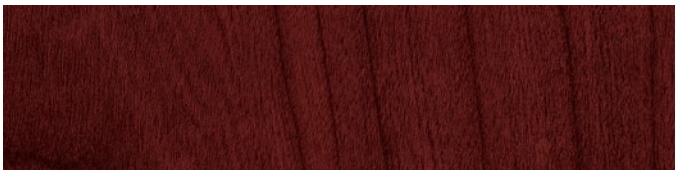

MLC Light Cherry

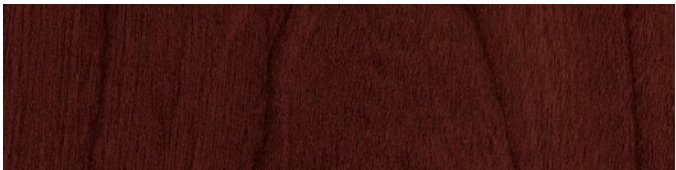

MFC Formal Mahogany / Cherry

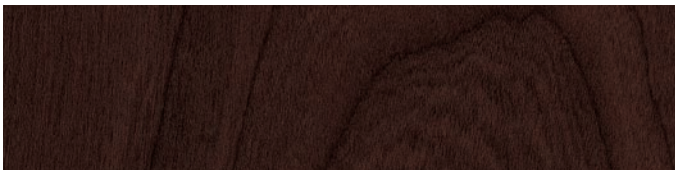

MCC Crescent Cherry

MVC Vintage Mahogany / Cherry

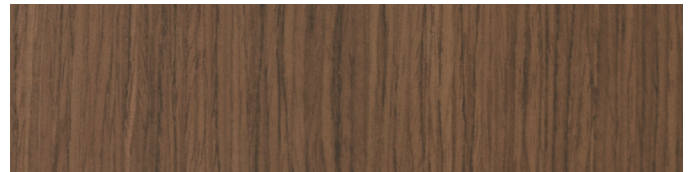

MGC Grand Cherry

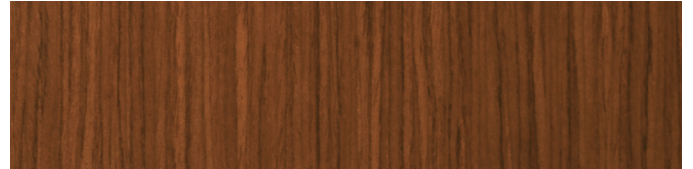

MSC Sable / Cherry

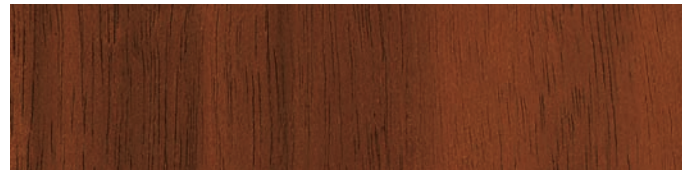

Walnut Finishes

MNW Natural Walnut

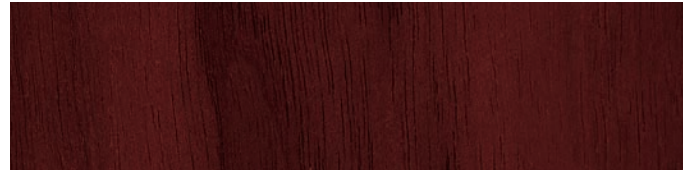

MGW English Walnut

MAW American Walnut

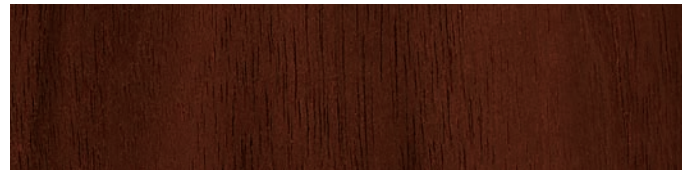

MFW Formal Mahogany / Walnut

MVW Vintage Mahogany / Walnut

MEW Executive Walnut

MLW Legacy Walnut

MSW Sable / Walnut

MATTE FINISHES

Our matte finishes utilize a multi step Euroluxe finish that enhances the natural hardwoods used in OFS Brands products. All matte worksurfaces feature smooth to the touch slightly visible open grain that allow natural grain variations to be felt through the final finish. See our price list for a complete list of standard matte finish products.

HAND-RUBBED FINISHES

Our hand rubbed finishes utilize a multi step Euroluxe finish that enhance the natural hardwoods used in OFS products. All hand rubbed worksurfaces are triple filled and utilize a high end automotive polishing process. This process creates a work surface that maintains the wear layer with great clarity, durability, and a rich, lustrous finish. See our price list for a complete list of standard hand rubbed finish products.

EUROLUXE™ WITH SILVERBAN™

Euroluxe™ is a chemically re engineered urethane clear coat that preserves the beautiful depth and clarity of OFS finishes. This allows for much greater performance with chemical, heat and scratch resistance, while achieving indoor air quality standards set by LEED and BIFMA furniture emission standards. The Euroluxe finish is applied with a premium patented spray process which is computer regulated to precisely control the timing and mixture of the sensitive materials. The unique chemical structure of the Euroluxe finish also allows for easy field repairs.

SilverBan™ technology uses silver ions infused into the Euroluxe™ wood finish for anti microbial protection on all exposed wood surfaces. SilverBan™ works continuously by disrupting key cell functions so that microbes can't grow or reproduce. In a time when employees' health and safety are key concerns for employers, SilverBan™ works 24/7 for an added level of defense. Laboratory tests show that bacteria can double within 20 minutes on unprotected surfaces. Most germs can only be seen by the human eye once they have multiplied to hundreds of thousands. Silver Ban™ technology immediately goes to work fighting the spread of germs and bacteria on wood surfaces. SilverBan™ inhibits the growth of mold, mildew, fungus and bacteria on wood surfaces, as well as odors caused by bacterial growth, by 99.99%.

GREENGUARD

OFS has achieved GREENGUARD Certification by the GREENGUARD Environmental Institute (GEI), an industry renowned expert in the areas of indoor air quality, public and environmental health, building design, and construction.

All OFS products within wood veneer casegoods, laminate casegoods, conference and seating have achieved this certification. This is an extremely important achievement for OFS and its customers as a continuous commitment to being responsible stewards of the environment. As an industry independent, nonprofit organization, GEI develops rigorous, consensus based standards for indoor air quality (IAQ) following globally recognized scientific methods. Only products achieving these high standards are approved to bear the GREENGUARD Indoor Air Quality Certified mark.
