

# FEATURE STORY: PRODUCT UPDATES

## OFS INTRODUCES LONDON LOUNGE

London Lounge Seating was created by exploring the possibilities of using moulded plywood in a modern lounge setting. Available as single, twin and three seater lounge units London Lounge also features tables and various styles of benches. “The feeling that we aimed for with these products was a contemporary expression of the furniture that explored the use of moulded plywood, typified by the classic designs of Charles Eames,” said Mike Wagner, OFS Vice President of Sales and Marketing. “We sought to reference these classics and produce a range of furniture that also addressed the needs of the contemporary office.”

OFS also wanted to explore the possibilities afforded by waiting and meeting areas to offer furniture that is both intriguing in design and necessary in comfort. Lounge designs also have to be grounded in design and able to go from corporate areas into more public spaces. To minimize cost to the client, many of the same components used to create a relaxed lounge and chair, group together with a more formal bench and table range.
